

The Kings College Junior School **NATURE PLAY PROJECT**

*Creating a nature play space
that enhances the play and
learning opportunities for every child.*

The Kings College Junior School Nature Play Project will:

- ✓ Strengthen the educational experience for every student by providing outdoor learning opportunities that support physical, social and emotional health and development.
- ✓ Capitalise on the natural beauty of the Kings College surroundings through the development of an engaging and innovative play space that enhances students' understanding of God the Creator.
- ✓ Cultivate inclusive, imaginative, inspiring, cooperative and active play for all students. The play space will consider students with special needs, including disabilities, and take into account universal design principles.
- ✓ Provide different levels of risk, reward and challenge to promote the learning of life skills such as problem solving and risk taking. The play space will adhere to current Australian safety standards.
- ✓ Foster student responsibility and engagement.
- ✓ Be an affordable and low maintenance play space for current and future Junior School students, which serves as an asset to attract new families to Kings College.
- ✓ Reflect the Warrnambool climatic conditions by creating shade and shelter to ensure students can maximise the use of the play space throughout the year.
- ✓ Support the vision of Kings College in '*seeing every student achieve their full potential through Christian education*'.
